[johnathanlund@yahoo.com](mailto:johnathanlund@yahoo.com) (801)885-9062

## SKILLS

AngularJS 2, NodeJs, Express, MongoDB, ES6, HTML, CSS3, Sass, Less

JavaScript, MySql, JQuery, Gulp, Webpack, Typescript, Bootstrap Git/GitHub

## PROJECTS

### Silver & Gold Holiday Lights– [www.silverandgoldholidaylights.com](http://www.silverandgoldholidaylights.com)

A front-end application created for Silver & Gold Holiday Lights.

- Contracted to create company website from ground for their frontend. A single page company site, on both desktop and mobile screen sizes, created to grab the user's attention with a focus on initial action to contact them

### Told Handyman – [www.toldhandyman.com](http://www.toldhandyman.com)

A full-stack (MEAN2) application created for Told Handyman.

- Contracted to create company website from ground up, backend to frontend. Created front end public site, with a private admin side that has administrative controls to change almost all content with ease for the company user.

### Dev-Housing -

A full-stack (MEAN) application created for the DevMountain school housing.

- A focus on front end administrator tools that directly connect/interact with students and better track student interaction in housing.
- Created backend database collections in MongoDB, along with the front end connections and styling that matched a UX designers plans.

## RELATED EXPERIENCE

SHOP MANAGER ASSISTANT/WEB DEVELOPER at TOLD PLUMBING – 2014 – 2017

- Worked with the Owner and dept managers to help with daily business needs from shop to job sites, including their websites.

NIGHT MERCHANT AT COSTCO – 2013 – 2014

- Received and stocked shipments, informed staff and customers on products.

LOAN OFFICER/VAULT TELLER AT UTAH COMMUNITY CREDIT UNION – 2007 – 2012

- Responsible for all transactions and accounting for branch, supervised and trained branch employees. Loan officer covering home equities & other loan types. Office manager for all office needs.

## Education

DevMountain – Provo, UT

- 13 week web dev immersive bootcamp consisted of intense instruction in HTML5, CSS3, JavaScript, AngularJS, Node.js, Express, MongoDB, and Mongoose.
